Narration:

Just what is everybody talking about?

Located in central Indiana, Camp Atterbury Joint Maneuver Training Center offers a diverse number of venues designed to support national security requirements of the 21st century.

The traditional training locations within the main installation of Camp Atterbury, combined with the complex urban environment Muscatatuck, just 45 miles south east, and protected airspace create a desired real world training and testing bed that increases efficiency and lowers training cost.

Camp Atterbury Joint Maneuver Training Center is over 35,000 acres in size. Within its boundaries are:

- Convoy live-fire range
- Multiple small arms, sniper, and demo ranges
- Small Arms Live-fire shoot house
- IED defeat lane
- Urban assault courses
- Atterbury Air to Ground Range
- Airfield operations
- Reception, staging and personnel processing (RSOI)
- Virtual medical simulation training center

The Atterbury Gunnery Range provides a realistic environment for synchronized joint training scenarios for air and ground forces including heavy-aircraft drops.

Atterbury/Jefferson Air Ground Ranges have:

- Air-scored targets
- Strafe targets
- Rocket targets
- Laser capabilities
- Day and night operations for manned and unmanned activity
- Restricted airspace for unmanned flight testing and training

Camp Atterbury Joint Maneuver Training Center also has a wide range of simulation capabilities.

The Camp Atterbury Simulations division includes:

- 25-acre Joint Simulations, Training and Exercise Center (JSTEC)
- IED Battle Drill Simulator
- Engagement Skills Trainer
- Reconfigurable Vehicle Tactical Trainer (RVTT)
- Vehicle Convoy Operations Trainer (VCOT)

Atterbury-Muscatatuck Capabilities Video Transcript

- Dismounted Soldier Training Simulator
- Joint Training Enterprise Network 2.0 (JTEN 2.0)
- Humvee and MRAP Egress Assistance Trainer (HEAT/MET)
- Virtual Battle Space 2 (VBS2)
- MRAP Common Driver Training (MRAP CDT)
- MRAP Virtual Vehicle Trainer (MRAP VVT)
- Call For Fire Trainer (CFFT)

Camp Atterbury's advanced urban training facility, Muscatatuck, is a 1,000-acre site with existing buildings, a 180-acre reservoir and a fully operational infrastructure in the midst of an isolated rural location.

Development of the site continues based on the needs of the users and the environmental plans designed as key areas within the world. These structures include:

- Collapsed Structures
- High Rescue Trainer
- Cave System
- Confined Space Areas for Emergency Rescues
- Walled-Embassy
- Governor's Residence
- Religious Center
- Walled Community
- Business Zones
- School
- Authentic Marketplace
- Afghan Farm
- Soccer Stadium
- Radio Station
- After Action Review Facility
- Range Operations Center Communications
- Instrumentation Technology (Fiber Optical Cabling To Zoned, Electrical/Communication Rooms)
- Power And Data That Distributes Power
- Data Outlets
- Electromagnetic Environment
- Cameras

Camp Atterbury Joint Maneuver Training Center is able to offer a diverse portfolio of capabilities, services and programs by drawing on the strength of the military, government agencies, universities and private partnerships to ensure training requirements are met. The only thing that is missing here, is you.
