Cover Photo: A soldier with the 38th Infantry Division gazes into a phoropter during her pre-deployment vision appointment, Saturday, Feb. 2, 2019, in Avon, Indiana. Ensuring that all soldiers have the correct vision prescriptions and quality eye care is essential to the 38th Infantry Division's mission of medical readiness. Photo by Cpl. Hannah Clifton

The Way Ahead...

Camp Atterbury to host Cyber Shield

For two weeks in April, National Guardsmen and Reservists from across the United States will descend on Camp Atterbury to take part in Cyber Shield, an exercise to train in cyber protection, network defense, forensic analysis, techniques and procedures to defend against cyber attacks, hackers and other malfeasant acts. Atterbury's unmatched training opportunities include a live, full-scale, truly kinetic cyber range capable of conducting live, virtual and constructive scenarios. It also includes standard live-fire ranges for crew and individual weapon systems.

Cyber warriors monitor their computer screens for attacks during Cyber Shield 18 at Camp Atterbury in May 2018. More than 800 service members and civilians gathered at the southern Indiana post to be a part of the National Guard's ongoing effort to be a versatile capability for governors of all 54 states and territories.
